“Fine Art Rescue Deux”

04 December – 12 March 2010

Various Media; Paintings, Photography, Sculpture & Ceramics Friday, 08 January 2009 at 6:00 PM- Opening Reception

CHICAGO—at The Architrouve –We are pleased to present our annual exhibition, “Fine Art Rescue Deux”, a new collection of art works selected to promote dialogue concerning conservation processes and the distinctive secondary art-market, which offers fine art at a fine value.

Featuring the work of both local and internationally known artists, the exhibition introduces salvaged items during the course of their varying conservation stages to expose the importance and complexities of salvage and fine art conservation. Once salvaged and perhaps conserved, the re-contextualized artwork creates a unique market, offering the discerning buyer opportunities to acquire important and desired works that have so far not been attainable.

A panel discussion will be organized, during the exhibition period, to include experts from the fields of conservation, fine art and insurance. Date of discussion is TBD.

Image samples below – All work will be for sale
